Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Examiner and Applicant reviewed various proposed amendments. Examiner advised Applicant that the John reference substantially embraces the spirit and scope of Applicant's disclosure and thus substantial amendments are needed to overcome this reference. Applicant proposed adding various network monitoring or routing features to the claims. Examiner indicated that these features were widely known in the art at the time of Applicant's invention and would result in a rejection if submitted. Applicant also proposed further defining the structure and definition of the executed service as described in the specification on pg 12. Examiner indicated that including limitations that further defines the structure and definition of the executed service may overcome the John reference but further consideration would be needed after reviewing the specific claim structure. .
